DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 19 and 20, directed to the species II is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Alfred K. Dassler on September 15, 2005.

3. The application has been amended as follows:

In the Specification:

Art Unit: 2823

In Page 11, line 6, change "Fig. 11" to --Fig. 11A-11B--.

In the Claims:

In Claim 1, line 9, change "conducting" to --subsequently conducting--.

In Claim 1, line 12, change "removing" to --subsequently removing--.

Allowable Subject Matter

4. Claims 1 and 3-20 are allowed over prior art of record.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "covering the contacts with a protection arrangement; subsequently conducting injection molding to introduce an encapsulation material between the contacts and into the trenches, whereby the chips arranged on the dicing substrate are encapsulated; subsequently removing the protection arrangement," as recited in claim 1.

Claims 3-18 also allowed as being directly or indirectly dependent of the allowed independent claim.

Claims 19 and 20 also allowed because of including all the limitations of the allowable generic linking claim, i.e., claim 1.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
